

Our vending and storage solutions. A flexible and accurate way to manage stock.

Remove the headaches associated with storing, dispensing and re-stocking personal protective equipment (PPE) and safety supplies at your site. Staples Vending Solutions has the answer to your stock challenges.

Our knowledgeable Facilities team will provide a customised program that's right for you, enabling 24/7 accessibility to the products your workforce needs. Through our efficient and automated solutions, we can make sure you order only the items needed, saving you money on stock and reducing overhead costs associated with monitoring traditional storage.

The vending solutions can be installed at multiple locations, and customised to suit your specific site requirements. We can help you with a solution for just about any item, large or small.

By partnering with industry-leading manufacturers, we pride ourselves on providing you the newest products and latest innovations that meet required safety standards.

Keep your stock secure.

HID swipe card access ensures employees use only what they need. Wastage and theft are reduced.

You're in control.

You define what stock employees can access. Track usage, control inventory and manage purchasing through the complete inventory management system.

Conveniently productive.

Leave the stock management, top-up and delivery to us. Meanwhile, employees will love the easy and fast access to the products they need, leaving more time for them to do what they do best.

Benefit the bottom line.

Reduce procurement costs via web-based software intelligence, minimising product duplication and excessive inventory wastage.

It's in the detail.

We can provide you with stock movement reporting on over 200 different functions, including current stock on hand, projected usage, user-specific consumption, and item-specific consumption.

Here to help.

Full support including training, implementation and troubleshooting rests with Staples Vending Solutions team.

A software and equipment solution.

The right software

Proactive inventory management is easily achieved through AutoCrib Software, which integrates with Staples' ERP system for a fully automated process. On your end, the modern user-interface design and search function couldn't be simpler. This software solution offers:

- Notifications of critical item shortages.
- Access control by user levels.
- Real-time data when you need it.
- A customised dashboard.

The right machine

In conjunction with the software, Staples Vending Solutions can offer a range of machine types that provide secure access to a variety of items, small or large.

Staples Vending Solutions provide the machine and software package on a leasing arrangement customised to you.

| 03. RoboCrib LX2000 | Rotating Carousel | Up to 2574 | 50–60 | 3 Years | PPE |
| 04. AutoCrib RDS (Remote Dispensing Station) | Coil | Up to 60 standard setup | 30–40 | 1 Year | High value, fast moving and critical inventory items |
| 05. EleVend | Elevation (Bottom Up) | 3–24 | 5–10 | 3 Years | High speed and volume items such as gloves and PPE |

A barcoding solution.

We can streamline and manage the ordering and replenishment process for almost any product through our innovative barcoding solution, exclusive to Staples.

Our team can help you select a storage location that meets your site's requirements, servicing any area from a cupboard, to a basement or storage cage.

A Staples Vending Solutions merchandiser will regularly visit your site to scan and order an agreed list and quantities of your selected items. We can monitor and replenish any item small or large, including bulky items such as washroom paper products, safety products and cleaning supplies. Leave the hard work to us, and never get caught short without the products you need again.
